

ISRAA KHALED, Ph.D.

TELECOM R&D ENGINEER

- Paris, France
- [israa-khaled.github.io](https://github.com/israa-khaled)
- +33 6 56 67 85 06
- israa.khaled.n@gmail.com
- [israa-khaled-495a5117b](https://www.linkedin.com/in/israa-khaled-495a5117b)
- Israa-khaled

PROGRAMMING

Python, C#, C (Unix), Java, MySQL, VHDL

TOOLS & SOFTWARE

Jupyter Notebook, MATLAB/Simulink, Visual Studio/.NET, LaTeX, Adobe Design & Illustrator
Also familiar with (academic use): NetBeans, MySQL, Mathematica, Eclipse, LabVIEW, Arduino, Orcad/PCB, Proteus, Simplorer, Quartus, AutoCAD

PERSONAL SKILLS

Teamwork
Problem analysis and solving
Adaptability

LANGUAGES

Arabic : Native
French : Fluent
English : Full Professional

INTEREST

Nature
Photography
Writing

SUMMARY

Telecom R&D Engineer with 6+ years' experience in 4G/5G radio access networks, signal processing, radio propagation, and radio frequencies. Seeking to contribute to innovative R&D projects in a dynamic team. **My website:** israa-khaled.github.io

EXPERIENCE

POSTDOCTORAL RESEARCHER

LTCl, Télécom Paris, Institut Polytechnique - Paris, Februar 2025 – Present

- Project carried out within the PEPR Project and the LINCS Lab
- Power consumption modeling in 4G and 5G radio access networks

RADIO FREQUENCY ENGINEER | TEST & CHARACTERISATION

Vectrawave - France, November 2023 – February 2024

- Design and development of evaluation boards for Monolithic Microwave Integrated Circuits (MMICs). (AutoCAD, Hardware)
- Characterization and measurements of MMICs (S-parameters and power benches)

POSTDOCTORAL RESEARCHER

LabSTICC, IMT Atlantique - France, May 2022 – October 2023

- Development of a MIMO-assisted wake-up radio method to improve the energy efficiency of IoT networks
- Supervision of two internships on RIS channel modeling in mmWave bands and on wake-up radio techniques with MIMO beamforming

RESEARCH ENGINEER, PH.D.

LabSTICC, IMT Atlantique - France, October 2018 – March 2022

- Design of angle-domain NOMA schemes for multi-user mmWave systems with massive MIMO, leveraging partial channel state information
- Development of resource allocation algorithms to enhance spectral efficiency using angular information with digital and hybrid beamforming techniques

RESEARCH INTERN

LabSTICC, IMT Atlantique - France, March – July 2018

- Investigation and evaluation of the impact of 5G channel environments and large-scale 2D/3D antenna arrays on existing precoding techniques

CERTIFICATION

Standardisation & Technology
EIT Digital -Coursera, July 2025

Supervised Machine Learning (33 hours)
DeepLearning.AI and Stanford Online-Coursera, April 2025

EDUCATION

Ph.D. in Telecommunications

IMT Atlantique-France, October 2018 – March 2022

Master's Degree in Research in Networks, Telecommunications, and Security
Faculty of Engineering, Lebanese University-Lebanon, 2017–2018

Degree in Electrical-Electronic Engineering. Section: Computer and Communications
Faculty of Engineering, Lebanese University-Lebanon, 2013–2018
